This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. It is an invariable rule at Sea, that when two Vessels meet each other on opposite Tacks, the one on the Larboard Tack (that is having the wind on the Larboard side) is to bear away, or put about if necessary.

The Vessel on the Starboard Tack is not obliged to change her course.

INTRODUCTION.

AS the following WORK may fall into the hands of persons, who do not understand how communications may be made by SIGNAL, it is necessary to explain the process to such persons.

THE significations or matters to be communicated, are arranged under their respective heads, in alphabetical order, and to each signification a marginal number is prefixed.

THE FLAGS in the Plate, represent the marginal numbers.

WHEN any particular signification is to be communicated, hoist the FLAG or FLAGS, which represent its marginal number in the order in which the figures stand,

having the Flag which represents the first figure uppermost, as the Signal is to be read downwards.

As soon as the party addressed has made out the Signal, and taken it down on paper, or a slate, he is to acknowledge it by hoisting the *general answering flag*, No. I. Upon which the Signal and Answering Flag are to be immediately lowered; but if the Signal cannot be made out, the Answering Flag is to be hoisted *half mast high*.

If the communication is completed by the first Signal, when it is acknowledged by Flag 1. the addressing party is to hoist the Flag S.; the person addressed, is then to look into the Signal Book for the marginal number he has written down, and opposite to it he will find the signification intended to be conveyed.

But if the communication is *not* completed by the first Signal, the addressing party will continue to Telegraph after the first Signal is acknowledged, and when the communication is finished will hoist the Flag S. as above explained.

If there are more vessels than one in company, and one of them *in particular* is to be addressed, hoist the number of such vessel, and when she answers (by Flag 1.) make the intended Signal. If a *particular vessel's* number is not previously hoisted, the Signal made is to be considered as a general one, applicable to the whole Fleet, and to be answered by each of them.

LOCAL TABLE.

The following Seventeen Signals are made by hoisting the Substitute either over or under one of the flags. The Substitute is represented in the margin by the letter S.

The blanks may be filled up by such local significations or particular sentences as any two parties may previously agree upon.

This Table will be found particularly useful in communications between Steam Boats or other Vessels and their Agents on shore.

SIGNIFICATIONS DENOTED

BY THE

FLAGS WHEN HOISTED SINGLY.

FLAG 1.—GENERAL ANSWERING FLAG, to be hoisted by the party addressed as soon as the Signal is made out; if it cannot be made out, to be hoisted half-mast high.

FLAG 2. NEGATIVE ANSWER TO A QUESTION.

FLAG 3. AFFIRMATIVE ANSWER TO A QUESTION.

FLAG 4. INTERROGATIVE FLAG, TO DEMAND A VESSEL'S NUMBER.

FLAG 5. PRIVATE SIGNAL.—If two persons wish to have the means of private communication, let them previously change the *numbers* of the Flags by mutual agreement;—for instance, let Figure 1, be represented by Flag 6. Figure 2, by Flag 8, and so on. Thus if the Signal 12 is made, a person not apprized of the private arrangement of the Flags, would suppose the Signal to be 68, and would thereby be completely mislead. ☞ Observe however that Flag 5, and Flag C. are not to be changed. When a Signal is to be made by the *private* arrangement here mentioned,—first hoist

FLAG 5, and when answered, make the intended Signal, according to the private arrangement of the Flags, and not according to the general arrangement in the Plate. A simple way of effecting this object, is to prefix a private number by previous agreement, in red ink, to each Flag in the Plate, different from its own number; and when a private Signal is made the numbers in red ink are to be written down, and not the usual ones; and the Signal looked out in the book accordingly.

FLAG 6. ANNUL and RECALL—denotes that the last Signal is to be annulled or discontinued; also that a vessel or boat dispatched is to return immediately.

FLAG 7. Denotes that the subsequent Signal is contained in part III.

FLAG 8. Denotes that the subsequent Signal is contained in part IV.

FLAG 9. Denotes that the Vessel hoisting it, intends to sail immediately.

FLAG. 0. *Jack, see sentences,* No. 946 and No. 955.

FLAG S. when hoisted singly, denotes that the previous signal completes the intended communication, unless it is shewn the party addressed is to expect another Signal. When this Flag is hoisted *under* any of the other Flags, it is a substitute for the Flag immediately over it, thus the Signal 88, would be made by hoisting Flag S. under Flag

8. It is also sometimes hoisted above the other Flags, as will be seen in the marginal number, in different parts of the CODE.

FLAG C. COMMODORE'S DISTINGUISHING FLAG. Whenever hoisted with the other Flags, it implies that the Signal is to be found under the head of YACHT'S NAMES, (PART VI.) when it will be denoted in the marginal number by the Letter C.

ALPHABET.

IF it is necessary to spell two or more successive words by the ALPHABET; make the signal 99 as a stop between each word.

PART V.—VOCABULARY.

Signals made from the Vocabulary, are distinguished by Four Flags being hoisted at a time.

When this CODE of Signals was printed, it was intended that the Signals in the beginning of the first part should be communicated by Pendants; but it has since been found that Flags are more convenient, and can be seen at a greater distance, the figures 1. 2. 3. 4. 5. 6. in the marginal numbers of PART I. are therefore represented by Flags, instead of Pendants.
